

Securenets - plik konfiguracyjny serwera

Położenie: /var/yp/securenets.default (rw-r--r--)

© Imagine Studio 2005, <http://myGentoo.tk>

This file defines the access rights to your NIS server for NIS clients. This file contains netmask/network pairs. A clients IP address needs to match with at least one of those. One can use the word "host" instead of a netmask of 255.255.255.255. Only IP addresses are allowed in this file, not hostnames.

Always allow access for localhost

255.0.0.0 127.0.0.0

Pozwalam na dostęp z mojego LAN

255.255.255.0 192.168.0.0

This line gives access to everybody. PLEASE ADJUST!

0.0.0.0 0.0.0.0

Ostatnia aktualizacja: 30 marzec 2005.
